Comment: I am very concerned at building on green belt land - this can never be replaced once built on. England and the health of London needs to retain its green belt land - there is plenty of brown field sites available first. Also looking at the outline of the building plot why is it encroaching on an area behind the KGV playing field? What is this for? Our roads and services are inadequate for these proposed developments and what was once a pleasant village is losing its authenticity to become a 'garden suburb' - what a pity and shame on the planners if they allow this to happen.
