Address: 7 kingswell ride

cuffley potters bar

Comment Type: Observation

Comment: I am writing to object to the planning application for a housing development on Green Belt Land.

The increase in traffic the development would create during construction and once built would add considerably to the already congested roads in Cuffley particularly the B156.

If the development were to be built many of the new residents would use the train service into London from Cuffley Station and the trains are already over crowded at peak times It is already hard to secure places for children at local schools.

Cuffley has already seen a growth in its residents as many flats have been built in recent years with more being built at the moment and further developments planned for the future.

Additional residents will put a strain on the local health service.

The Green Belt should be left for future generations.
