From: Oliver Waring

Subject: N6/2013/1078/FP – Erection of part single, part two storey rear extensions

I have been on site to assess the above application and its possible impact upon trees or vegetation on or adjacent to the site.

The proposed works to the building will not have an effect on any trees or vegetation however the proposal includes alterations to the front driveway and garden.

These alterations include the removal of a yew hedge to the front. The design of most the gardens in this area are that of open frontage with this garden being the one exception. The removal of the hedge is seen as a positive and will be in keeping with the other front gardens along Brockswood Lane.

Details of the proposed landscaping would be helpful as to ascertain the suitability of the plants being used.

I trust the above is clear. If you have any further queries let me know.
