Council office Extension Reference N6/2013/1938/MA

Dear Sir

I am writing to register my objection to the proposed extension to the Council Offices in Welwyn Garden City town centre. I have seen a drawing of the design and to my eyes it looks totally out of keeping with the rest of the building and certainly does not reflect the high standards of architecture for which WGC is justifiably renowned. We live in the conservation area of the town and have always had to conform to the rules when replacing windows etc. to preserve the Garden City look and I do not see how the Council can justify breaking its own rules as is proposed with this design. If the Council can do it, others will want to do the same and we will lose our unique architectural heritage of which we are very proud. The original building is very attractive, please do not spoil it with this glass box.

Yours faithfully

Ann Meers
