Dear Mr. Saminaden,

Council Offices building

My parents and I came to live here in 1924. I have therefore seen a huge extension to the WGC. Always it has kept the original type of building both private and public. I have never seen a more dreadful plan than that for the proposed extension. It is absolutely appalling and contrary to any other building. It must be possible to build in brick as the rest of the offices. It could never have got passed at all if proper consultation had taken place. Why the hurry now? Is there any way

occupation of Bridge Rd. East can  
be extended? That would save  
millions of money. Apparently also  
the extension will be inadequate from  
staff angle from the start. Have the  
councillors been adequately informed  
from the outset? If not, why not? We  
elect them for proper consideration about  
the town. If the Council staff are not  
concerned too, there needs to be much  
better thought given to employing them.

Start again - ditch the proposed  
extension completely.

Yours faithfully

(Miss) Phyllis R. Weaver
