Dear Mr Saminaden,
Ref Council Office Extension N6/2013/A33/1411.

I am shocked to learn of the implementation of very questionable plans to extend the present council offices.

The Council Offices are situated within a conservation area. The proposed extension fails to apply the spirit of preservation of inherent good planning and fails to value the heritage left to us by the early planners of this Garden City.

The proposed plans fail to meet the criteria laid out in the Conservation Document: -

- a) Use of alien materials eg concrete, steel and glass construction versus red brick & tiles
- b) Unacceptable roof line

Does not the Planning Committee report
the Conservation Document in the same way, are
the residents are expected to conform and adhere
to it?

There seems to have been a lamentable
lack of consultation with WGC residents and I
suggest some discussion and a review.

Yours truly
