REF: AMENDED PLANS: N6/2013/1938/MA...

RE: Erection of three storey extension and single storey extensions on rear elevation, plus access/landscaping etc to Council Offices, Campus East, Welwyn Garden City.

Dear Mr Aston, case Officer,

I have this morning examined the AMENDED plans for the above proposal and yet again I find myself forced to make it very clear that I most strongly object to the whole poorly conceived design. The new amendments, changes to doors and some unintended additional brickwork are quite insignificant when viewed as part of a monstrous ill-conceived scheme.

Quite frankly I expect this council, who monitors other pre-war buildings in Welwyn Garden City, to have a lot more sensitivity. I myself live in a pre-war house the council would be justified to be "disturbed" should I choose to erect what amounts to a giant glass box attached to my own house.

continued-

2-

I fail to see why the Council has seemingly one set of rules for residents and another for themselves. Transparency and the highest integrity is part of our democracy, which is why I would like to know if the County's conservation officer has been made fully aware of this atrocious piece of planning design and its over-all effect on the very important Garden City principles and ethos.

I therefore most strongly OPPOSE either of such designs as being out of place and totally unsuitable to this town. This is especially so when 'attached' to an award-winning building such as the Council offices. I look forward to some form of common sense, and the TOTAL REJECTION of this application,

yours sincerely,
