**Subject:** Council Office extension

Councillors,

For the second time we wish to lodge this objection to the Council Office extension, ref No N6/2013/1938/MA.

This extension is still clearly in breach of the Planning Department's own criteria, which states that any extension in the conservation area should be subservient to the main structure. Any materials used should reflect the original building. This glass mass still fails on both points and the amended plans do not lessen the impact of this extension.

Please bring this objection to the attention of the appropriate officer and also to the member who sits on the Development Management Committee.

James and Sheila Morgan
