Subject: Amended Council Office Extension

Council Office Extension reference N6/2013/1938/MA

Dear Sirs

I should like to register an objection to the amended Council Office Extension plans and to highlight the issue of the Council's breach of its own rules in the conservation area.

The exterior design of the proposed extension is not in keeping with the existing building. While I would welcome good design that moves the architecture of the town forward, I'm afraid this design significantly fails to do that, showing little respect for the context, materials, proportions, or scale of the original building. The adoption of a new style, forcing it onto a traditional building form, lacks imagination and flair. It shows little respect for an award winning and much admired building. The entire concept is out of context and sympathy with the original.
