Comment: I pass behind the council building every day on my way in and out of work (which I do not think is the case for many of the pensioners who have objected en masse to this proposed plan). I feel that the proposed plan in its current form is absolutely fine; and also note that the council building has changed many times over the years (formerly a fire station I believe).

I would also like to make clear that the WGC Society does NOT speak for the residents of Welwyn Garden City as a whole, and their opinions should not be given any undue weighting.
