Comment: The height and rear projection of the proposed development would result in over development of the site.

The proposed extension would introduce an extension to the front of the garage which would have an adverse impact on our property (no. 25) and give the feeling of enclosing the front of our property.

It would appear that despite our previous observation, the proposed side extension is still to be built on the boundary line which would result in a slight overhang. Any encroachment onto our property should be avoided.
