Planning application N6/2013/2219/FP

Re the above application and the proposed changes to the north side extension, in reconsidering the impact of these plans on my property, I would like the Council to take into account the adverse effect of the increase in height of the part of the extension housing the hot tub area relative to the height of the present wall. Coupled with the proposed increase in length of the extension, this will be a more intrusive structure, lead to loss of light and adversely effect the view from my lounge bay window and garden.
