Accuracy

Final examination for accuracy is your responsibility. Before approving any proof, please examine carefully for accuracy including spelling, logo integrity, orientation, finishing detail, size and general layout etc. If anything is illegible please contact the artwork department for clarification or a duplicate copy.

Colours

Please note that when we are printing from your supplied artwork we will not be held responsible for inaccurate colour reproduction if CMYK artwork is supplied without a chromalin and/or pantone information. Where colour reproduction is critical please supply pantone references and/or chromalin. Pantones will be matched to 90% accuracy. Also note that the colour intensity enjoyed on most other substrates cannot be guaranteed on canvas and flag type material.

Small text

Our machines are calibrated to print super large format. Small text (less than 10mm) is often difficult to reproduce with clarity. Please advise where clarity is essential.

©2011 Voodco DesignWorks Limited. Production of any proposed new items illustrated on this document are strictly prohibited without the express permission of the copyright holders.
