Dear Ms Phillips,

Planning application: N6/2014/0539/FP. 7 Densley Close, WGC. Erection of 2x two storey side extensions.

Thank you for consulting Hertfordshire Ecology on the above application.

The LRC database does not hold any habitat or protected species data for 7 Densley Close. The proposed extensions to the dwelling will have no direct impact on the existing roof and only a very minor impact, if any, on the existing roofspace (which is largely occupied). Therefore the proposed development is highly unlikely to impact the local bat population (or any other protected species).

Therefore, we conclude that there are no known ecological constraints regarding the proposed development and the application can be determined accordingly.

Yours sincerely,

Barry Tranter PhD MCIEEM
