Comment: The PC objects to this application on the grounds that this is part of/linked to the Metropolis development application - S6/2014/1697/PP - to which we have already objected.

We understand that in some similar District Heating Schemes, for instance a recent scheme in Southwark, there were a number of above ground structures such as Inspection pits, Manholes and Small Plant Housings. These types of structures seem to be needed at key points, particularly at 90° levels.

We understand that there are no above ground structures shown in this application and we find this to be a questionable assumption.
