Date: 10/07/2018

Dear Michael,

Application Reference: 6/2018/0825/MAJ

Proposed development at: 37 Broadwater Road Welwyn Garden City AL7 3AX

Proposal: Construction of new build of 22 x 2 bedroom and 2 x 3 bedroom residential apartments with balconies and roof garden, layout of 26 car parking spaces, cycle parking, refuse store, internal access routes, landscaping and supporting infrastructure

Thank you for consulting Hertfordshire Ecology on this application. I apologise for the delay with this reply.

I note we previously commented on planning application 6/2016/2497/MAJ at this site, which was granted in 2017. These proposals are similar and relate to a new build structure and I have the following, similar, comments to make now:

The Hertfordshire Environmental Records Centre has no habitat or species data for the application site, which is a modern office building with negligible ecological value. There may be potential for common breeding birds to use the roof structure for nesting and a precautionary approach should be taken to avoid harming or disturbing birds, their eggs or any active nests. I recommend the following **Informative** is added to any permission granted;

“Any works to the external roof structure should be avoided during the nesting bird season (March to August inclusive [Natural England]) to protect breeding birds, their nests, eggs and young. If this is not practicable, a search of the area should be made no more than 3 days in advance of works and if active nests are found, the area should be cordoned off (buffer 4m) and/or works should stop until the birds have left the nest.”

I trust these comments are of assistance.

Yours sincerely,

Anita Parry
