Comments:

Thank you for sight of this application on which I comment from a crime prevention perspective. I have looked at the supplied documentation and have visited the site to assess the layout.

I have received a completed Secured by Design (SBD) application form for this development, expressing a desire to achieve the Gold standard.

The result is that this development will be designed and constructed to incorporate all reasonable crime prevention measures that are appropriate in this area with regards local and national crime trends to reduce the criminal opportunity.

I therefore am very happy to fully support this application in the knowledge that the future occupants will be able to reside in a location that will suffer dramatically reduced crime levels due to adherence to the SBD principles.

Case Officer:  
Ms Louise Sahlke
