<b>Comments</b>	<p>It is noted that there are 71 parking spaces which comply with the maximum parking standards however, the I have an issue with how they are designed. Tandem parking is a practical challenge as people do not want to keep moving vehicles to allow someone else access. this would be challenging with two cars, but three would mean residents and their visitors would start parking on the carriageway, personally I think layby off the carriageway would be more practical.</p>
