Comments	<input type="text" value="Our property backs on to the disused railway and Woodside House beyond. The proposed bin store location is visible from our house, particularly from our first floor. Two comments:
1) The application states (S8) that no new lighting is proposed. Any amendment to this may be a concern due to increased light pollution, given the owner replaced the lighting to the rear elevations of the buildings with extremely bright white LED lamps with no shielding that shine directly into our property and are on all through the night. It is a particular nuisance in winter when their deciduous trees shed their leaves. We would object to additional lighting.
2) Controls should be imposed to minimise odours from the bins (particularly in view of the prevailing south westerly winds) and noise constraints to avoid anti-social hours' use."/>
