Comments	<input type="text" value="The proposed development is 9 metres from my residence - block 2 on drawing - (the existing bin area is 17.5 metres from the nearest residence) and is overlooked by my kitchen and bedroom windows which will causes noise and disturbance. The existing bin area is located at the far end of estate and is unlit during the night, the proposed development will be located under a scheme street light - on during the night - so proposed site can potentially be used 24/7 causing noise and disturbance. The bin collection which takes place at approximately 5am will take place directly under my bedroom window causing noise and disturbance. The proposed development will potentially cause smells and attract vermin and flies to the area which is a genuine concern for me. The proposed development has no footpath/pavement access, users will have to enter and leave directly onto the road. The loss of 2 or more parking spaces which are used regularly by residents and visitors."/>
