

I have serious concerns over new development that is taking place in our area. It is clearly a violation of the supplementary planning document that council produced in 2008 as mentioned in the application and feel it will severely impact our life who moved to this area because of how wonderful it is for young and old families due to its calm and quiet surroundings and basic amenities. The saddest part is we weren't even notified about this voluminous development appropriately which is going to impact in many ways as mentioned below, we feel neglected and betrayed TBH.

Some of my concerns are:

**GP practice**- already it was almost impossible to have same day appointment and had to wait

**Parking**- prolonged issue with people who do not reside in area park their cars to catch train

**Traffic**- will be super loaded

**Schools**- again it is an issue for us to get admission in with selectivity of areas against population

**Privacy and suffocation**- impact hugely on privacy with flats overlooking our private gardens which never was an issue before, we wont feel comfortable plus it will be suffocating with tall buildings around us with views blocked

I wanted to know why we were not informed beforehand, are we prepared to tackle the issues mentioned above, how can we sanction development when it doesn't fulfil the requirements and not abide by our own words?

I sincerely hope you'll genuinely look into it and resolve the issues.

Many thanks for your kind understanding.
