Comments	<input type="text" value="Please can you confirm who has made this planning application and on who's behalf? My understanding is that the funding to purchase this site was public funds over 2/3rds of the cost with the balance paid by the university of Herts - have the public funding been returned (east of England development fund) Once you can answer the above I would like to confirm an objection to this archaic development with no thought to the heritage of our town or the impact of a concrete monstrosity along with the other two planning applications - where is your vision for carbon zero properties - a co create jungle - you might as well just pull out the heart of the city and bring an incinerator into the equation we can all jump up and down on the ashes. This really is shameful"/>
