Subject: BioPark proposal :Planning - ObjectionBioPark proposal:Planning - Objection

**** WARNING: This email originated outside the WHBC Network. Please be extra vigilant when opening attachments or clicking links ****

Good morning

I am quite sure you are familiar with the planning proposals for this site, given the Objections that you must have already received I won't repeat them.

Clearly the infrastructure of the Town will in no way support such a vast increase to the population, we are regularly faced with water shortage already.

The provision of medical services would be totally inadequate.

Evacuation from the site would put risk on all services..

Transport is under tremendous pressure, supposing these residents will be commuters.

No provision for adequate Parking.

No recreation outside space.

The impact of the density proposed at a time when the opposite is recommended must be considered please.

Many thanks,
