Comments	<input type="text" value="The height and mass of the development is out of keeping with the ethos of the Garden City and its development, providing homes with gardens to improve quality of life for its residents. Other buildings and the environment will be affected by loss of daylight and wind tunnel effect, no more than 4 storey building is acceptable in the Garden City. Infrastructure, healthcare, education and employment provision is insufficient to support this density of development. The Garden City will no longer be a town where people want to live."/>
