Subject: Objection to the planning permission granted to Shredded wheat - Polycell and Roche sites during pandemic.

**** WARNING: This email originated outside the WHBC Network. Please be extra vigilant when opening attachments or clicking links ****

Hi all at the planning department

I trust you are sleeping well at night?

Have you any conscience and become aware of the grave mistake you have made with the developments you have allowed to be started during this world wide pandemic.

You know those of use proud enough to have been born here or lived here for a large period of our adult lives love the vision of Ebenezer Howard, the 2nd Garden City
Now looking more like a urban jungle with no thought for parking, schools, Doctors, dentists

and green spaces.

You remember it's a garden city!

Well if you dont stop the developement I will continue to ask questions about all those involved until we get to the very murky bottom of this because it's a scandal.

Can you provide me with details of the zero carbon foot print or the alternative energy sources provided for these properties, do you have a blue print for future of properties to be built during this ecological disaster, but maybe you havent noticed.

An extremely disappointed and disillusioned resident of Welwyn Garden City
