Comments	<input type="text" value="I object to the current application because; There is unnecessarily high rise development, so cap at 5 stories the density of housing will create social and service issues Too few facilities will not meet the needs of residents eg parking/health/education Building design will alter the iconic environmental green appearance of our Garden City Non adherence to the development principles of WGC, altering the whole culture So; reduce density and height of units, build in new and additional services, maximise environmental impact"/>
