> Dear Sirs/Madams

>

> I am writing to you regarding the proposed planning for the Broadwater Rd flats (including Biopark, Wheat Quarter and Southside). I strongly urge you to not approve of the plans. The density of housing is much too high relative to the green space available for rest and recreation. The number of stories of the flats is way too high. Towns desperately need recreational green areas to improve people's quality of life - a "garden city" should be the epitome of this - not a densely packed high rise area. Please reconsider before your legacy is the ruination of this green town.
