Comments	<input type="text" value="The extension to this application goes against the local plan limiting buildings to 5 storeys. Having a 10 storey building in the middle of Welwyn Garden City goes against the ethos on which Welwyn GARDEN City was built. The town does not have the infrastructure to accommodate this level of building. There is nothing in this plan to sustain the number of people and their requirements for hospitals, schools and more importantly green space. Where are these people going to park and how are they going to get in and out of WGC, which is already congested during rush hour. This development appears to be based on return on investment rather than the individuals well being"/>
