Comments	<input type="text" value="The density and height of the building is out of proportion to the rest of WGC. The proposed density far greater than those in inner London - how does that support a garden city? Resulting in a negative impact of such high number of residents. There is insufficient parking spaces putting pressure on the already overcrowded surrounding roads. Local schools are already at full capacity. None of the proposal fits with the current garden city and will create an eyesore on the award winning tree city of the world area."/>
