Comments	<input type="text" value="Please provide a copy of the Noise Report prepared by Hepworth Acoustics in June 2021. Please make it available in documents supporting the application. It is essential that we see this report before the expiry of the consultation period so that we can comment on it. If it is not available then the consultation period should be extended. Please also specifically confirm by way of reference to the relevant legislation why the installation of 286 solar panels on Campus West in a conservation area does not need planning permission when permitted development rights have been removed by virtue of the building being in a conservation area. The solar panels should not be visible from anywhere on the ground as they will be ugly to look at. I object to the application on the grounds that there is no noise mitigation and the air source heat pump will be visible from the ground."/>
