As our local councillors, I am sure you are disturbed at the lack of consultation over the development of the multi-storey carpark at Campus West and the curious way in which the planning application is being handled.

I would urge you to do all you can to:

- Ensure that the consultation period is extended by at least another 4 weeks.
- Ensure that all local residents and everyone who commented at the public engagement phase are made aware of the release of the new planning application through the legal planning consultation process.
- Ensure that the application is “called in” so it can be determined by the DMC and not by a planning officer.

Regards

60 Woodland Rise
